Dear Michael

Further to your e-mail below and our earlier discussion I can confirm that the revised policies appear unlikely to have any significant effect on European sites. We would advise that the HRA be amended accordingly to include reference and brief discussion/assessment of the revised policies to identify no likely significant effect; however, discussion of Policy 22 should include reference to its requirement for a '*Norwich Policy Area (NPA) Local Plan to be produced two years after adoption of the part JCS if the housing targets set in the part JCS are not met....*' and the requirement for this plan to be then subject to HRA.

I hope this is helpful.

Many thanks  
Janet
