

## **GNDP Response to Inspector's Agenda for 9 December Item 5**

5. *Taking stock concerning GNDP's proposed new diagrams RF25A (Biodiversity Enhancement Areas) and RF25B (Proposed Green infrastructure Network). Where are these from and, since they have not been seen before, do they require advertisement?*

The plans, with minor presentational adaptations for clarity agreed with Natural England, such as showing the GNDP boundary, have been in the public realm for 3 years. They have been consulted on as part of the JCS evidence base and therefore do not require advertisement. The sources of the plans are:

- RF25A Source: Report of Ecological Mapping Network for Norfolk (Executive Summary, map 2, page 27), referenced in Greater Norwich Green Infrastructure Strategy (ENV6) under section 4.1.10 and 4.3 of Appendix I.
- RF25B Source: Greater Norwich Green Infrastructure Strategy (ENV6) Annex A Figure 7.1

The plans are indicative, intended to be for illustrative purposes to give a strategic context for policies in the Joint Core Strategy and do not form policy in themselves. Text to this effect and reference to the sources of the maps has been added to the publication version of both maps.
