Subject: Comparative Sustainability Information

The Inspectors have asked if you could check that this chart shows the correct number of pluses and minuses for the 5 options covered and have asked you to comment

(a) on the support or otherwise that this information provides for the favoured option and

(b) to identify any further evidence which provides support for the claim of Topic Paper 8 that the favoured option provides the overall 'best fit', notwithstanding that the SA attempts to make comparative measures of a wide range of environmental, social and economic factors.

Many thanks

Louise

Comparative sustainability information from EiP14(1) re 5 options

1	29+	Medium term	29 +	5-	Long term
