

3520/IC1 Appendix I

4th February, 2011

For Inspector Foster.

Dear Ms. Howe,

Following my recent submission I have just this minute been advised that no Traffic Impact Assessment has been carried out for the proposed development of 3,400 houses in the area of the triangle. How can they justify the development without one? The last TIA took place at the junction of Wroham Road and Blue Boar Lane in 2002 by Mott McDonald. I still have the figures. It proved that by altering the alignment of Blue Boar Lane, the traffic passing this section of Wroxham Road would increase by 70%. Since it happened we have to turn left, go round the new roundabout and return passing our own properties to travel towards the city.

Knowing how the Residents Association fought the above, I am certain they will agree with this late submission.

In haste,

Mrs. M. Howes.
