**953/IC7**

**Joint Core Strategy for Norwich, Broadland and South Norfolk: Inspector's changes IC 7**

Norfolk Wildlife Trust supports the proposed changes under IC 7 relating to paragraph 5.6 and paragraph 5.8 and the inclusion of new green infrastructure (RF25b) and biodiversity enhancement (RF25a) diagrams. In our view the biodiversity enhancement map serves to illustrate that the ecological aspects of the green infrastructure strategy are founded on work carried out on biodiversity opportunities by the Norfolk Biodiversity Partnership, which have already been recognised in adjacent LDFs. At the same time, the green infrastructure map focuses on opportunities for access to the countryside and how these may relate to designated sites and core biodiversity areas.
